DETAILED ACTION

1. This office action is in response to Amendment - After Non-Final Rejection filed 07/25/2007.

Response to Arguments

2. Regarding rejection of independent claims 1 and 6 under 102(b) as being anticipated by Besson (US 5,218,289) applicant has argued that the pair of limiters 40,50 cannot be called a subtractor, and that Besson does not form a difference signal and that the resonant filters 44,54 cannot be called peak detector (see applicant's REMARKS page 4 first and second paragraphs).

Applicant's arguments have been considered and are persuasive.

Allowable Subject Matter

3. Claims 1-10 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of independent claim 1 is the inclusion of "differential signal of two input signals may be formed over at least one predefined period by means of a first subtractor, at least one maximum value of the at least one differential signal may be detected by means of a first peak detector and at least one minimum value of the at least one differential signal may be detected by means of a second peak detector and at least one further differential

Art Unit: 2858

signal may be formed from the at least one maximum value and the at least one minimum value by means of a second subtracter”.

The primary reason for allowance of independent claim 6 is the inclusion of “wherein at least one differential signal of two input signals is formed over at least one predefined period, at least one maximum value and at least one minimum value of the at least one differential signal is detected and at least one further differential signal is formed from the at least one maximum value and the at least one minimum value”.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Zimmer (US 4,084,133) disclosed method of and apparatus for determining phase difference between two signals A, B at least one differential signal of two input signals by means of first and second subtractor (-) 17,18 and detector 19,20 for detecting differential signal (Fig. 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
